ABOUT ME

I am a Statistics undergraduate aspiring to become a Data Analyst, with strong analytical and problem-solving skills supported by a foundation in statistics, data analysis, and IT. I have experience in data cleaning, analysis, and visualization using Excel, Python, SQL, and Power BI. I enjoy transforming raw data into meaningful insights that support decision-making. I am a motivated learner who adapts quickly to new technologies and works effectively both independently and within teams.

PROFESSIONAL EXPERIENCE

Internship Trainee — People’s Bank (Kelaniya) Nov 2022– May 2023

Assisted in daily banking operations, record management, and customer service activities.
Developed problem-solving, teamwork, and communication skills in a professional environment.

EDUCATION

University of Colombo <i>BSc in Industrial Statistics & Mathematical Finance</i>	2023 – 2026
ACCA (Association of Chartered Certified Accountants) <i>Achievers College</i>	2026 Present (Ongoing)
Gurukula National College – Kelaniya <i>G.C.E. Advanced Level Examination - Physical Science Stream</i> Chemistry-B, Combined Mathematics -C, Physics-C	2020
<i>G.C.E. Ordinary Level Examination</i> Results: A-8, B-1 (English – A)	2017

PROJECTS

- Walmart Sales Data Analysis Project**
 - Conducted end-to-end data analysis on a real-world Walmart sales dataset obtained from Kaggle to generate actionable business insights.
 - Performed data cleaning, preprocessing, and database management using Python and SQL; developed optimized queries to solve key business problems related to sales and customer behavior.
 - Analyzed sales trends, customer preferences, and branch performance to generate actionable insights that support data-driven business decisions and operational improvement.
 - Technologies:** Python, SQL, Data Analysis, Data Cleaning.

2. Logistic Performance and Cost Efficiency Analytics Dashboard

- Developed an interactive analytics dashboard using Power BI and advanced DAX measures to evaluate delivery performance, cost efficiency, and environmental impact; implemented data cleaning, modeling, and KPI tracking techniques.
- Analyzed regional delivery trends, delay patterns, partner performance, and sustainability metrics to generate actionable insights supporting data-driven decision-making and operational optimization.

Technologies: Power BI, DAX, Power Query, Data Modeling.

3. Olympic medal Prediction Using Linear Regression (Machine Learning Project)

- Built a machine learning model using Scikit-learn to predict Olympic medal counts; performed data cleaning, feature selection, and exploratory data analysis to identify key performance factors.
- Evaluated model performance using MAE and conducted country-wise error analysis to generate insights on prediction accuracy and performance variability across teams.

Technologies: Python, numpy, Scikit-learn, Seaborn, Google Colab

SKILLS

- **Data Analytics & Statistical Concepts:** Exploratory Data Analysis (EDA), Data Cleaning, Statistical Analysis, Machine Learning
- **Programming & Data Handling:** Python, SQL, Pandas, Matplotlib
- **Business Intelligence & Visualization:** Power BI, Tableau, Dashboard Development
- **Analytical Tools & Software:** Excel, SPSS, Eviews

SOFT SKILLS

- Problem Solving, Leadership
- Time Management, Ability to work as part of a team, Communication

PROFESSIONAL CERTIFICATES

- Business Analytics with Excel - Microsoft
- Python for Beginners - University of Moratuwa
- Basics of DAX in Power BI - UniAthena
- Statistics for Data Science – Simplilearn
- AI/ML Engineer - Stage 2 – SLIIT
- AI/ML Engineer - Stage 1 – SLIIT
